Council Meeting

A regular meeting of the council of the M. D. of Lamerton No. 398 was held in the Municipal office, Alix. Reeve Tallman, Dep. Reeve Crown, Councillors Cockerl Stevenson and Sherburne being present.

The minutes of the meeting of Aug 11th were read and adopted on motion of Dep. Reeve Crown. The report of the Inspector of Municipal Offices was read and after discussion was accepted on motion of councillor Cockerl.

A letter from the Hudson's Bay Co. Land Commissioner was read in regard to a diversion in n.w. 20-30-22 acquired in 1916 by the Dept. of Public Works and only paid for in part. On motion of Stevenson compensation for the land taken, was passed for payment.

On motion of Councillor Stevenson Reeve Tallman and Councillor Sherburne were elected delegates to the convention of the association of Alberta municipalities to be held in Calgary in November.

The application of B. W. Lawson of Tees for a poolroom license was presented and tabled until the October meeting.

The monthly financial statement was read and adopted on motion of Dep. Reeve Crown.

Mr. Frank Finell appeared before the council in regard to people passing through his land this matter was left in the hands of the Reeve, being in his jurisdiction.

On motion of Councillor Cockerl A. M. Crown was requested Dep. Reeve for a term of six months.

On motion of Councillor Stevenson the Secretary was granted two weeks vacation commencing Sept. 24th, after which date the office will be closed until October 8th.

A number of bills and payables were passed for payment on motion of Councillor Stevenson and the meeting adjourned at 8:10 on motion of Councillor Sherburne.

C.G.I.T. NOTES

The Rainbow group held their meeting on Thursday, the 13th opening with several songs the girls had learned at camp. As this was the first meeting after the holidays, the members present were in favor of an election of officers. Those elected were: Peggy Ennis, president; Frances Holditch Vice President; Barbara Walker, Sec.-treasurer; Mildred McDonald, Assistant; Ellen Webster, Doorkeeper and Emma Durrant, press reporter. A new reporter will be appointed each week. The program of meetings will be intellectual, physical, spiritual and social.

After some discussion the members decided to hold an intellectual meeting next Friday, Sept. 21 at 7:30 p.m. to which their others will be invited.

Frances Holditch and Emma Durrant were appointed to select the program. Mildred McDonald, Jean Cairns and Ruth Jewell were chosen as lunch committee.

The meeting was then adjourned and closed with the usual prayer.

NOTICE

There will be positively no hunting allowed on the E. half of 20-10-22.

R. W. MacDonnell.

Douglas Puffer

Instantly Killed

While driving from Alix to Mirror on Thursday, Sept. 13th at 6 p.m., Douglas Puffer was instantly killed when a car in which he and Mr. Auger of Alix were driving, overturned on a rough piece of road about three miles north of Alix. Upon descending the hill the front wheel struck a dry rut which caused the car to jump to one side of the road and in trying to prevent it from going over the bank into the lake, the car turned over twice, throwing Mr. Auger clear, who received but slight injuries. Mr. Puffer who was caught under the steering wheel, was very badly crushed, causing instant death.

According to Mr. Auger they were not going at an excessive rate of speed and a similar accident might occur at any time on the same kind of road.

The sympathy of the community is extended to the widow and daughter, the parents, Mr. and Mrs. W. F. Puffer of Lacombe and the three brothers, G. P. Puffer of Mirror, L. W. Puffer, Lacombe and Stanley Puffer of Jasper.

For the past four years Mr. Puffer has resided in Alix, being engaged as accountant in the Alix creamery, and for the past three months has been connected with Mr. Mackie in the live stock business.

The funeral service was conducted by Rev. B. T. Hardin in the United Church, Lacombe, on Sunday afternoon. Interment was made in Lacombe cemetery.

W.I. CONFERENCE

The Women's Institute Conference of the Lacombe and Poncha Constituencies held in Mirror on Wednesday the 12th, proved a most interesting and enjoyable assembly, Mrs. C. M. Yarwood, district convener, presiding over the sessions.

This year's attendance was the largest in the history of the conference and the ladies of Mirror did everything possible to entertain the visitors.

The reading of the reports from the branches showed that the work is progressing in all localities. The program was pleasing, the musical portion being presided over by Mrs. J. Sorum and Mrs. G. A. Thompson.

On the election of officers, Mrs. Yarwood, three years convener, declined re-election and the honor has been passed on to Mrs. Oldring with Mrs. Andrews of Alix as secretary.

One pleasing feature of the afternoon program was the presentation of a beautiful bouquet to Mrs. Yarwood.

The 1929 session will be held at Lacombe.

Lacombe local was winner of the beautiful Canadian flag given by the Convener for the best suggested program for 1929.

We Need Forcibly Reminding Of The High Position Achieved By Canada In Recent Years

"We have been so dazzled by reports of the wealth and prosperity of the United States," continues "The Daily Herald," "that we need to be forcibly reminded of the position achieved by Uncle Sam's neighbor."

This was called forth by statements made by Hon. P. C. Larkin, Canadian High Commissioner in Great Britain, on the occasion of the Dominion's sixty-first birthday, to the effect that Canadians were the most prosperous and the highest taxed people in the world today, not excluding Americans.

The Daily Herald used the correct word, and it is applicable to most Canadians as well as to people in other countries. The property of the United States has been so far a full realization of our enviable position, although economists state that very small percentage of United States industry does business at a profit. Tax reductions at Washington have given us a false impression and blinded us to the fact that we are even heavily taxed, considering State, municipal and other forms of taxation of which we know comparatively little.

The comparison is not to the discredit of the United States. The spectacular progress has been dazzling. We have been at fault to the extent that we have permitted it to draw attention away from the advancement we have made, are still making, and are due to make in coming decades. It is gratifying, however, that now we have many friends at the core of public opinion ready to proclaim the greatness of the country. Newspapers and other periodicals at home and abroad are giving more space to the Dominion's achievements, and are finding co-operation from men high in business, industry, mining, agriculture, transportation and general business. A notable recent example of this is a supplement issued by The Economist (London) on the subject of "Commercial and Industrial Canada."

Mr. Larkin pointed out in an interview in The Daily Express that, according to estimates of the Dominion of Canada living in cities over their own homes. This is a unique position. Indicating both prosperity and stability. The cities and towns have entered an era of big business, their net production in 1925 being estimated at \$2,000,000,000. The Dominion's total production in 1925 being estimated at \$2,000,000,000. The Dominion's total production in 1925 being estimated at \$2,000,000,000. The Dominion's total production in 1925 being estimated at \$2,000,000,000.

The Dominion's wheat crop exceeds 500,000,000 in value yearly. The revenue from forest products is approximately double a billion dollars. The mineral output is half as much, double what it was fifteen years ago. Canada stands third among the nations of the world in gold production. It is also third in the per capita use of electrical energy. It is fifth as a manufacturing country with a population of less than 10,000,000.

Would it be too much to say that if other countries have been dazzled by the progress of the United States, that country has been dazzled by the prospects awaiting here? In 1913 United States investments in Canada aggregated \$137,000,000; in 1927 they totalled about \$3,000,000,000, more than half of total investment by foreign capital, including that from the United Kingdom.

This is a fact for Britishers and Canadians to keep in mind—Toronto Globe.

No man is ever so friendly that he can't find some one to jolly him along.

"What are you doing with that ladder?"

"I intend to steal a kiss!"—Pagen Gales, Yverdon.

W. N. U. 1745

Europe Studies Canada

Dominion Delegation Comes To Hamilton To Study Method Of Handling Grain

A Rumanian delegation of eight has recently reached Canada for the purpose of studying the system of wheat, standards, adopted in this country, with the hope that it may be applied to Rumania. The delegation, who have been sent by the Rumanian Government, will visit the wheat fields in Western Canada and follow the grain from the time it is cut on the prairie through its various stages until it is shipped from Montreal or Quebec on outgoing steamers. The system of grain handling at Vancouver may also be inspected.

Canada's rapid rise to the position of being the greatest wheat-exporting country in the world is attracting wide-spread attention to the system adopted in the Dominion for handling, grading, and marketing wheat.

Heats Sell For \$16.66 Each

Japanese Government Plans Large Order For Live Poultry From B.C.

After an experimental purchase last year the Japanese Government has just placed a large order for 300,000 live chickens to be shipped to Japan. It is claimed that no other poultry-breeding centre in the world could have filled such an order at this season or have supplied birds of such quality. Principal breeds are White Leghorns, Barred Rocks, Rhode Island Reds and White Wyandottes.

The shipment is part of a 10-year program and is a direct result of the World Poultry Congress at Oshawa, Ont., which was held last year. It consists of 300,000 live chickens with an aggregate value of \$5,000, an average price of \$16.66.

Stepping Stone To Success

No Shame In Failure When Best Has Been Done

The man has once more told of tragedies among pupils who have failed in school.

Do not smile at them. They are very serious in the losses they are in.

And the worst of it is that the failure often lies in the teaching, not in the pupils.

There should be no shame in failure where one has done one's best. The right way to avoid failure is by stepping stones to success.

For every success has failures behind it. Success consists of being right in a majority of the times. Just a fraction over 50 per cent is enough to swing the balance in growth-up life.

It is a pity that the young cannot be philosophical.

Considers To The Age

I know of no city so considerable of the age as New York. New Yorkers will leave in their work to escort old men and women across the street. Traffic cops leave their posts at the first show of benightedness on the part of aged pedestrians. Head waiters in cafes will almost invariably give elderly couples choice tables and even respectful hat-scratchers look on with sympathy when the old couple hats or wraps. It is rather pleasant to be old in New York.

Experience is the only teacher that can get anything into the head of the man who knows it all.

He who marries well marries neither his inferior nor his superior.

Deputy Minister Of Fisheries

W. A. Pound has recently been appointed as the new deputy minister of fisheries. Formerly he was director of fishery, and the government decided to establish a separate department. The new department will continue under the direction of Hon. P. J. A. Caudin, minister of marine and fisheries. The work of the marine branch has greatly increased since the advent of radio.

Mange In Swine

Mixture Of Live Linseed Oil, Tar Oil and Sulphur are Effective Remedy

A skin disease, sarcoptic mange, has appeared from time to time in some parts of the country. It is indicated by unthriftness, dryness of the skin, accompanied by continuous rubbing or scratching. In advanced cases rubbing is sometimes continued until the blood appears. The disease is confined almost entirely to the summer season. The Scott, Shastah, and Commercial Experimental Station had occasion to deal with this disease, and from their experience can recommend a mixture of live linseed oil, tar oil, and sulphur, applied by brushing one gallon of raw oil by the animal's coat, and then adding to this eight ounces of oil of tar and two pounds of sulphur, stirred in while the oil is hot. This preparation is applied every day for a week, in all parts of the body. The rag is merely moistened with the mixture to avoid blistering. Four treatments at ten-day intervals effect a cure. Between the third and fourth treatment the pens were thoroughly cleaned out, and the walls and floor sprayed with white-wash containing a reliable disinfectant. Referring to these experiments in the 1927 report of the Scott Experimental Station, the superintendent states that it is not necessary to whitewash the walls higher than six feet from the floor.

Turkey Scraps Old Titles

New Turkey has decided to scrap all the old official titles left over from the old regime beginning with the highest military title "Pasha" which henceforth will be "General." President Mustafa Kemal's name will thus be Westernized to General Ch. Mustafa Kemal instead of the old form Mustafa Kemal Pasha.

No Glamour In War

The romantic and the poet may still strive desperately to keep up the old glamour which surrounded the business of fighting. But it is not there, and they know it. There is no "shining armor" left in modern war; only mud and blood and a dulling of office work.

LE FOULON

Canadian Folk songs. The most popular event is entitled "Le Foulon," and was the contribution of the Canadian Folk Song Society. This popular event illustrates the old chanson of that name, sung by the inhabitants in the manufacture of hempen material during the process of shrinking. The singers are the Bytown Troubadours, who made their debut at the Quebec Folk Song Festival.

LE FOULON

The fête of St. Jean Baptiste is a day of particular celebration among the French-Canadians and although various interventions in the program, one of the most impressive spectacles was eventually presented in Montreal in which many thousands participated. "Jean le Pourcuire" was the title of the oratorio given in the Montreal stadium, which was preceded by a procession of floats carrying various well known French-Canadian folk songs.

Development Of Hardy Fruits For The Western Prairies Is Meeting With Good Success

WESTERN SHEEPMEN IN STRONG POSITION

Permanent Feeling Of Confidence Everywhere In Evidence

"Never have I noticed such a permanent feeling of confidence as seems to exist among sheepmen all through the Western Provinces," states W. H. Tisdale, of the Canadian Co-operative Wool Growers, who has just returned from his sixth annual western tour, during which he motored all through the principal range areas of British Columbia and Northern Alberta, as well as visiting practically the whole of the sheep farming areas of all four provinces. "Not only are the sheepmen confident, but I found the same feeling in respect to agriculture generally among the leading banking and railway officials of the towns and cities. Good crops and good prices have had a wonderful effect on prairie and British Columbia conditions and live stock is coming back rapidly."

Mr. Tisdale reported a continual trend toward mixed farming. Sheep are now considered to work in well with grain farming, where the property has been fenced. From 100 to 200 ewes are being kept on small half sections where, owing to the abundance of waste feed, their feeding cost is very small. The sheep have been very useful in cleaning up summer fallows clean and in helping to solve the weed problem.

"Unfortunately the sheepman's sheep development has taken place in British Columbia. There, farmers have doubled their sheep population in the past four years, and the Grazing Commissioner, T. P. McKeen, assured me that there was about 250,000 sheep, or more than fifty per cent of the total for all Canada, in the interior of this province alone."

"Unfortunately, according to the official of the Canadian Co-operative, the range lamb crop of the west this year, due to extreme weather conditions at breeding time last fall did not run over 50 per cent, but among the farm flocks of the west it was well up to average. The wool coming from this part of the country this year is as good as any western clip produced in the past three years and bright. Of the total western clip, the Co-operative expects to handle about 300,000 pounds from the flocks of Saskatchewan and Manitoba, and 1,200,000 pounds from Alberta this season."

Heavy Marketing Of Veal Calves

Sale Last Year Heaviest In Past Five Years

The increase in the dairy cattle population in the west, and the production is invariably followed by an increased marketing of light live calves. Last year the sale of calves was the heaviest during the past five years and showed an increase since 1923 of approximately 118,000 head. In a report just issued by the Department of Agriculture, at Ottawa, on the "Origin and Quality of Commercial Cattle Marketed in Canada Last Year," the quality of the calves as a whole was disappointing, there being a preponderance of "grazers" and a large percentage of very common veal stock. The report, which is distributed by the Publications Branch of the Department, shows by counties or electoral districts within provinces where the calves came from, the market classes to which they belong, and their destination. It also deals with other classes of market stock, including cattle, sheep, and hogs marketed throughout the Dominion in 1927.

Hundred Million Miles Of Wire

It requires 100,000,000 miles of wire to run the world's telephones. Of this wire mileage some 65,000,000 are found in North America. Germany with 10,000,000 has the second greatest mileage, and Great Britain comes third with 7,000,000. Canada with 3,500,000 is fourth.

To Be Continued

Little Emily had been to school for the first time. "Well, darling, and what did you learn?" asked her mother on Emily's return. "Nothing," sighed Emily, hopelessly. "I've got to go back tomorrow."

As the earth's crust is by no means rigid it rises and falls under the gravitational attraction of the moon and sun in a manner similar to that of the ocean's tides.

There are few districts in Canada where fine vegetables can be grown than in the Prairie Provinces. Provided the garden is well protected from the strong winds. The same thing holds true for the growing of raspberries and other fruit trees. It is not expected that apples and plums will for many years be raised in considerable quantities on the prairies, there being no development. What is to be expected is that in some of the settled sections it is quite possible for a farmer to raise sufficient fruit for home requirements.

The late A. P. Stevenson, of Manitoba, undoubtedly did more than any other private experiment in demonstrating the possibility of growing tree fruits in Manitoba. His program and the large numbers of young trees of varieties which he found hardy, mostly of Russian origin, and of recent years reports of the success of the growing of apples have been received from widely separated points in the three prairie provinces.

On the Dominion Government's nursery station at Indian Head, apples and plums originating from the province of all varieties are planted nearly twenty years ago and additional ones made from time to time. Several crops of fruit have been raised from these trees. In some areas over 1,500 pounds of plums, and 1,700 pounds of standard apples have been picked from a single tree. Given most general satisfaction are the Hibernian, Blushed Calville and Batten's Greening, while among the best are the McIntosh, Red McIntosh, Mammoth, Cheney, and Winnipeg. One of the chief difficulties to contend with is rabbit injury, and it is doubtful whether the trees are protected by a rabbit-proof fence. A good windbreak of trees is absolutely essential.

Conditions for fruit growing are not equally favorable all over the three provinces. In some areas, as in the southern Manitoba and southern Saskatchewan are not found to be hardy in areas farther north and west. It is safe to predict, however, that by cross-breeding, varieties will eventually be produced which will be hardy in all areas. Comparatively recent years that much attention has been paid to the breeding of tree fruits for the Canadian prairies, but a great deal of work along these lines is now being carried under the supervision of Mr. W. T. Macdon, Dominion Horticulturist, Ottawa, at the Dominion Experimental Farm, at Morden, Man., and at the University of Saskatchewan, at Saskatoon, and results so far are very encouraging.

A Dry Land Fish Pool

Pool Being Arranged In Manitoba For Attracting Fish

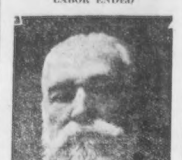

A new kind of fish pool, which operates on dry land, is being organized in Manitoba. It is modeled somewhat on the famous Canadian Wheat Pool and has for its purpose the marketing of the fish catch from the Great Lakes of Manitoba. Manitoba whitefish, pickerel, jackfish and tullies, are highly esteemed in the fashionable homes and restaurants of New York, Chicago, Boston, Philadelphia and other American cities, but at the present time a very small fraction of the price paid for the fish is received by the man who gathers the harvest of the deep. The promoters of the Fish Pool hope to increase the price of the fish without increasing the cost of the ultimate consumer.

Much of man's troubles are due to the fact that he does not keep enough of his thoughts to himself.

The average man is seldom willing to do the things he is constantly telling others to do.

"Don't talk to the pig!" The man has there cost 4 marks!"—Ludwig Kautz, Zellung, Cologne.

LABOR ENDED

Bishop Plamann, 40 years Anglican bishop of Calgary, and the long-est consecrated bishop in the British Empire, died in Calgary recently.

Experiments With Fertilizer

Superphosphate From Trout Stream Being Tried Out On Prairie

Experiments to test the value of superphosphate fertilizer for the west are being conducted in all three of the prairie provinces this summer. The provincial government field crops branches co-operating with the provincial universities. The superphosphate is being supplied by the western of Trail, B.C., where it is a by-product from the mining and smelting industry. The Manulife Insurance Company is supplying three dollars for each province to work with. These trials are equipped so that they show the grain and the fertilizer at the same time.

Winnipeg Newspaper Union

Attractive and Practical

An attractive apron that slips over the head with wide straps that will not slip off the shoulders is made of No. 418. You'll find it especially useful in making as it cuts a sturdy in one-piece. Printed enamel, English prints, plain gingham, and striped percale are smart suggestions. Pattern is furnished in sizes 36, 40, 44 and 48 inches bust measure. The 36-inch size requires 1 1/2 yards of material, with 7 1/2 yards of heading. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home seamstress. Price of the book 10 cents the copy.

League Is Fighting Illicit Drug Traffic

New International Convention Goes Into Effect In September

A general world-wide tightening-up of the illicit "drug" traffic is about to take place when the League's new international opium and harmful drug convention goes into effect on Sept. 20th.

Although the convention was launched in 1923, provisions were made that it could only become effective when ratified by at least 10 states of which seven must be members of the League council including two permanent members.

To date the convention has been ratified or adhered to by nearly 30 states but it was only Canada's recent ratification that gave the necessary number of council members.

THE UNTOUCHED MEAL

People Who Go Hungry With Food On The Table

"I simply cannot eat." Actual tragedy is suggested by these simple words often heard from people of all ages. It is the beginning of trouble that sooner or later reveals itself as indigestion, nervous dyspepsia, with violent headaches and a general loss of appetite.

It is a symptom you must not ignore. If you find suffering is sure to follow. It is a sign of a good appetite—the secret of keeping well—to keep the ability of the stomach to digest and purifying the blood. Dr. Williams' Pink Pills supply strength to the stomach and bowels, and enable them to digest thoroughly the food that nature has so graciously given.

First Woman Air Pilot

Lady Heath Employed By Royal Dutch Air Lines

Lady Heath, noted British air woman, has been engaged by the Royal Dutch Air Lines as a pilot for the passenger air service. She is the first woman to be employed.

Lady Heath, the former Mrs. E. B. Heath, is the wife of Sir John Heath, businessman and politician. She arrived at Croydon on May 17, from Cape Town. South for the first time. She is the first woman to be employed by the Royal Dutch Air Lines as a pilot for the passenger air service. She is the first woman to be employed.

For Sores Or Burns.—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of sores and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds.

The wood of the balsam is very light in color, and being odorless is very suitable for boxes intended for packing food materials.

SUMMER COMPLAINT Nearly Lost Her Little Girl

Mrs. Theodore Nett, Anthony, Ont., writes: "Last Fall I nearly lost my little girl. She was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and was nearly all across the room without falling down. At last my mother advised me to get a bottle of Dr. Fowler's Kidney and Bladder Pills."

and after she had taken a few doses she was relieved.

I also found it a grand remedy for colds and would not be without a bottle of it in the house for any illness.

It has been on the market for over 30 years; put up only by The T. M. M. Co., Limited, Toronto, Ont.

Write to The Borden Co., Montreal, for book-let with 85 tested recipes.

One tin of St. Charles Milk of water equals FOUR cups of water.

St. Charles Milk Unsweetened

Recipes For This Week

(By Betty Barley)

SCALLOPED EGGS AND CHEESE

4 eggs
1 cup grated cheese
1 cup soft bread crumbs
1 teaspoon salt
1 cup white sauce

Few grains cayenne.

Break the eggs into a buttered dish and cook in hot oven until they begin to turn white around the edge. Then cover eggs with white sauce, and over this the mixture of crumbs, cheese, and seasonings. Brown in very hot oven. Must not be overcooked by time cheese is brown.

ROLY-POLY

2 cups flour
4 teaspoons baking-powder
1 teaspoon salt
4 tablespoons butter
3 cups milk, scalded
1 cup sugar

Grated rind 1 orange.
1 cup water.

Mix and sift flour, baking-powder, and salt with tips of fingers rub in two tablespoons butter, and mix to a dough with milk. Roll out one-half inch thick, and cover with small pieces of orange pulp. Mix sugar, orange rind, and remaining butter, and sprinkle two-thirds of it over the orange. Roll up; pinch ends together; place in baking-dish, sprinkle with remaining sugar; surround with water; and bake about thirty minutes. Serve with an orange.

Miller's Worm Powders are a prompt relief from the attacks of worms in children. They are powerful in their action, and while leaving nothing to be desired as a worm expellant, have an invigorating effect upon the youthful system, remedying fever, listlessness, loss of appetite, and other ailments.

That follow disorders caused by worms in the stomach and bowels.

Small Thing To Look For

But Twenty-Fifth Billionth Of An Inch Means Much To Astronomers

Measurements equivalent to the one-26,000,000,000th of an inch have been made by Charles B. St. John, Mount Wilson Observatory, in researches to prove the contention of Professor Eddington, that the "light is bent" when it passes a gravitational field, such as the sun. Professor Frost of the Yerkes Observatory, explains that the amount of displacement sought and found by Mr. St. John is very minute, being a fourth of an inch. It was a small thing to look for but a big thing to find, because it presents another proof of the Einstein theory in regard to light rays.

Only the uniformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

To Represent Canada

Canadians To Attend International Fuel Conference in London

Edgar Stansfield, research engineer, scientist and industrial member of council of Alberta and B. J. Haanel, chief engineer, division of fuels and fuel testing, department of mines, will represent Canada at the international fuel conference to be held in London, England, Sept. 24 to Oct. 6. The conference is to be held under the auspices of the world power conference at the Imperial Institute. Some 22 countries will be represented.

It is expected that extensions of railway lines in the Yukon and Northern Alberta, will be completed in time to handle the 1923 crop shipments, which promise to exceed all previous records.

Minaud's Liniment—the Universal Remedy.

Much Like Human Beings

Fish Have Same Ailments and Require Lots Of Exercise

"Fish are very much like human beings. People who have them for pets should realize this and give them some consideration," says Miss Ida M. Holden, America's only woman fish doctor.

"Fish suffer from much the same ailments that the human species do and they cannot escape if their conditions of life are uncomfortable.

"We learn a lot about people from fish. Take the matter of exercise. If fish get lazy and don't exercise, they get sick. To remedy this at the New York Aquarium, you give them a change of scenery. We would be surprised how a more attractive swimming ground and an extra amount of sunlight arouses their enthusiasm.

"If fish eat too much of the wrong food, they get indigestion just like humans. And, like humans, they hate to take castor oil. I have had fish held in their mouths and spit it out later, rather than swallow it. I advise to watch them just like children to see that they get their medicine.

"An excellent motto to make sure you get it, is: 'Stocking fish to imagine yourself in his place. That makes you think.'

Would Be Sensible Law

Motor Brakes Should Have To Pass Certified Tests Regularly

It is strongly suggested that the time is coming in the near future when brakes must be tested and certified regularly; and the careful motorist will make no objection.

When it is remembered that 800,000 people were killed or injured in automobile accidents in the United States alone last year, and the fact that faulty brakes cause a majority of all accidents, the need for such a law may be realized.

Life becomes worth living, and the height of folly to drive with faulty brakes.

The Terror Of Asthma comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It sends you beyond the power of human aid to relieve until one tries to make that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. This relief comes with a rush. Life becomes worth living, and if the remedy be used persistently, the disease is put permanently to rest. Take no substitute.

Quite Possible

"The evening word on" continued the man who was telling the story. He chuckled.

"The would-be wit, 'but can you tell me what the evening word on that occasion?'"

"I don't know that it is important," replied the story-teller, quite unperturbed. "If you must know, however, I believe it was the close of a spring day."

For every dollar Canadian tourists spend in the United States in 1927, American tourists spent four dollars in Canada. It is said.

CUTICURA

Best For Both Mother And Child

Regular use of the Soap, assisted by the Ointment when required, not only cleanses and purifies the skin of children and adults, but tends to prevent clogging of the pores, the common cause of pimples and other unsightly conditions.

Designed FOR Dependability

Firestone engineers found that the life of a tire depends as much upon the flexing life of the cords of the carcass, as upon the toughness of the tread.

To provide extra strength, stamina, and long wear, Firestone dips the cords of the carcass in a rubber solution. This saturates and insulates every strand of every cord, minimizing internal friction and gives thousands of extra miles. The Firestone Dealer in your locality will gladly serve you, and save you money.

FIRESTONE TIRE & RUBBER CO. OF CANADA, LIMITED Hamilton, Ontario

Mid Miles per Dollar

Firestone BUILDS THE ONLY GUM-DIPPED TIRES

RUG YARN

\$1.15 per pound up. Twenty-one weeks from October 29th to November 4th inclusive. This was decided at the closing session of the annual meeting of the Canadian Fisheries Association in Montreal. For a number of years a national fish day has been observed, usually in October, but dealers have come to regard this as insufficient. The purpose of fish week is to popularize fish as a main article of diet.

National Fish Week

Would Popularize Fish As A Main Article Of Food

Canada is to have a national fish week from October 29th to November 4th inclusive. This was decided at the closing session of the annual meeting of the Canadian Fisheries Association in Montreal. For a number of years a national fish day has been observed, usually in October, but dealers have come to regard this as insufficient. The purpose of fish week is to popularize fish as a main article of diet.

Minaud's Liniment For Blistered Feet

A fishing rod that registers the weight of each fish as it is caught has been invented and its inventor probably will starve and probably deserves it.

No electrical device has yet been invented that can take the place of "wire pullers" in an election campaign.

Red River Voyageur Dead

One Of Last Survivors Of Courageous Northern Adventurers

One of the last of the Red River voyageurs, Ed. Carriere, 89 years of age, died recently at Winnipeg, following a few weeks' illness. Carriere was one of the band of intrepid and courageous men organized by the Hudson's Bay Company to direct the carrying of freight to Fort Pemberton and to return with the furs.

Indian Surrender Lands

12,000 Acres Block In Saskatchewan To Be Sold

W. M. Graham, Indian Commissioner for the Prairie Provinces, announced the surrender of 12,000 acres of land on the Little Black River Reserve in the Humber, Sask. district. It is all good farming land, but much too extensive for the 40 persons then in possession. The land will be sold at public auction and the proceeds added to improve the living conditions of the Indians.

Stings and Bites.

The pain of insect bites disappears quickly with the application of Dr. Minard's T.V. bottle.

Minard's T.V. is the KING OF PAIN.

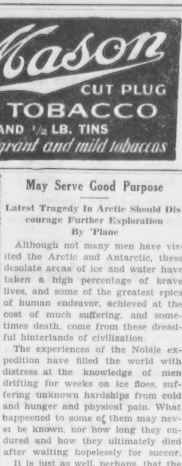

A great deal of time is wasted by turning the other fellow to have common sense. If he hasn't common sense, he won't get it, so let him alone.

W. N. U. 1745

whole adventure will have served some purpose if it causes a revulsion of public feeling against expeditions of this kind. The fate of the *Niebuhr*

party shows that under conditions such as are likely to be met with in these regions, the airship is no more reliable than the balloon was in the days of the Andre expedition, which left for the North Pole nearly thirty years ago and was never heard of again.

Little Helps For This Week

"God is not the author of confusion, but of peace." I Cor. xiv, 33.

Light strains of music, soft and sweet
That break upon a troubled sleep
I hear the promise, old and new,
"I comfort His faithful children
And keep them in My love."
In Perfect Peace.

It stills the questionings and doubts
The saddest heart can bring through its
soul:
It speaks of love unchanging, sure;
And evermore its echoes roll
In Perfect Peace.

True peace is found only in the
possession of God; and the peace
of God is the only peace that
only in submission to faith and ob-
edience to law. Resist every forbidden
joy; restrain every wish that is
not referred to this will, banish all egotism
and self-interest; and realize only the
will of God; seek Him alone—
and you will find peace; you shall enjoy
it in spite of the world.—Pascal

Recognized as a leading specialist for the detection of worms, Moth-eater Graver, Worm-Eater Exterminator has proved a boon to suffering children everywhere. It seldom fails.

Taking His Revenge

Conductor—“To St. Paul, eh? Why don't you stay on and go to Glacier Park?”

Passenger—“Because I want to go to St. Paul.”

Conductor—“Can I sell you a seat in the chair car?”

Passenger—“No, not today.”

Conductor—“A nice dinner on the diner at one-fifty?”

Passenger—“Are you kidding me, Conductor?”

Conductor—“Not at all; you're my barber, aren't you?”

Teacher—“What people are scattered all over the earth?”

Class (in chorus): “Pedatians!”

digestion

Be sure to get the genuine Philip Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions.

WORLD HAPPENINGS
BRIEFLY TOLD

Announcement is made by the minister of National Revenue, Hon. W. T. Fisher, of the coming into effect of the trade treaty between Canada and the Baltic Republic of Latvia.

The British Government will establish agricultural schools to train idle coal miners to be farmers, preparatory to their migration to the Dominion to settle upon free land.

Lord Salisbury, Lord Chancellor of Great Britain, heads the nineteen delegates from Westminster on the trans-Canada tour of the British Empire Parliamentary Association.

Plans under consideration of the New York Central Railroad call for the co-operation of the Canadian Pacific Railway in establishing air mail routes between Minneapolis, St. Paul and Winnipeg via Duluth.

Miss Audita Ralston, a young woman to fly the Atlantic ocean, has sent a cheque for \$1,500 to Commander Richard E. Byrd as his contribution toward the Byrd Antarctic expedition.

Believing that Alfred Loewenstein might have poisoned the family of the dead man in the case of the mission to the suit charging an unnamed person with poisoning Loewenstein, in the event traces of poison are found in the body.

Sir Austen Chamberlain, foreign secretary, announced in the House of Commons that Great Britain had reached a compromise with France over the naval disarmament question, which would be submitted to the other naval powers and eventually to a disarmament conference.

The cabinet council has confirmed the appointment of the commission to enquire into the return of the natural resources of Manitoba to the province. The person will be Mr. James Targem, superintendent of the Saskatchewan survey of C. P. Hon. T. A. Cramer, and C. A. Bowman of Waterloo, Ont.

Dr. B. Donny, former editor and proprietor of The Simcoe Recorder and former president of the Canadian Weekly Newspaper Association, is dead. He had been in poor health for some time and retired from newspaper work several years ago, after he had built up one of the best known weekly newspapers in the Dominion.

Modernizing E.P. Ranch

Electric Pumps Furnish Light and Pump Water For Ranch Buildings

The ranch of H.R.H. the Prince of Wales, has been electrified. Two large individual electric plants, of the type used by thousands of Canadian farmers, were installed recently on the E.P. ranch, completely electrifying the many buildings which form a small city on the farmstead. Two electric reservoirs supply systems were also installed to supply drinking water, so that kerosene lamps and water from a pump are as rare at the ranch house as they are in the Prince's home in London.

Stabilizing Easter

Moped That International Agreement Will Be Reached For Fixed Dates

The measure stabilizing Easter to Great Britain and Northern Ireland, first reading in the House of Lords recently, will not be effective until an international agreement has been reached, it is stated.

The bill provides for observance of Easter on the Sunday after the second Saturday in April, instead of determining the date by the phases of the moon.

One of the world's first hospitals was founded by Princess Macha, in Ireland, about 200 B.C.

"What little children go to heaven?"
"Dead ones!"—Bondsman-Straits, Bismarck.

W. N. U. 1745

Farmers' Marketing Tour

Canadian National Railway's Tour To Great Britain and Denmark, 1928

(Continued.)
We had London an early forenoon, being on the way to Cambridge by 8.30 a.m., passing through Waltham Cross with the King of the Hilly Cross, re-counted by King Harold in 1060, Chesham, which was invaded by the Danes in 885, and Epping Forest, the former royal game preserve, which is now the Londoners' favorite playground.

It would be impossible to describe the charm of the colleges of Cambridge University, its peaceful setting among the green hills, the towers through which runs the River Cam, or the beauty of the time-worn mansions. Nor could one hope to convey the sense of atmosphere that time has given to this ancient seat of learning, something of which we could learn in our hurried trip through the grounds. Fortunately, we had the opportunity of visiting King's College Chapel. The towering vaulted roof of this poem in stone, the soft light filtering through the stained glass windows, the dim shadows, the beauty of the organ poised high in the centre of this noble building, spoke to heart and mind, and sent of man's aspiration to Divine things. King's College Chapel is, as well as architecturally, a masterpiece of art in its interior.

After lunch at King's College we had lunch in the dining hall, the room in the company's dining hall, at the head of the table. Again we felt the sense of privilege, of "atmosphere" for surrounding us were portraits of some of the famous men who had been given to man's sustenance, visible evidence of our continuity with the past.

A delightful luncheon was followed by a list of welcome from the Canadian National Railway. We had lunch in the dining hall, the room in the company's dining hall, at the head of the table. Again we felt the sense of privilege, of "atmosphere" for surrounding us were portraits of some of the famous men who had been given to man's sustenance, visible evidence of our continuity with the past.

Professor Sir R. H. Biffen, Director of the Plant Breeding Institute, then discussed the experiments which had been conducted with a view to introducing some of the qualities of the English wheat into the Canadian wheat, cattle, horses and poultry.

Professor Sir R. H. Biffen, Director of the Plant Breeding Institute, then discussed the experiments which had been conducted with a view to introducing some of the qualities of the English wheat into the Canadian wheat, cattle, horses and poultry. Visiting the Forestry Section, we saw specimens of Douglas Fir, Bird's-eye Maple, Canadian Poplar and one of the finest specimens of English oak standing in the world. The colorimeter with a bog inside of it, the chemistry of the soil, the Temperature Station were examined. We were then taken to see the Hereford hanging experiments and the use of carrying animals and rabbits in low temperatures were being conducted. The Forest Section of the station were explained by Sir Wilfrid, who had been at a meeting in the University Arms Hotel, after which undergraduates entertained us to a musical programme.

The itinerary for the following day was given to us by one of the most remarkable concerns in the world. Mr. J. H. Biffen, Director of the Plant Breeding Institute, then discussed the experiments which had been conducted with a view to introducing some of the qualities of the English wheat into the Canadian wheat, cattle, horses and poultry.

They enlarged their orchards. Insect pests led them to keep poultry. The failure of hens to keep down the orchard pests induced them to add ducks. Then they went to cattle, pigs, sheep and bees. Today Chivers farm 6,000 acres of land and raises annually 12,000 chicks, 6,000 ducks, and 2,000 pigs. Histon cattle have won four championships one reserve, seven firsts and four second prizes at the last Royal Show of England, and five championships were included among the awards won by Chivers at the 1925 and 1928 Royal Shows. They have been no less successful with their Yorkshire and Middle Whites in winning championship awards. They also keep half-bred sheep and Percherons.

It was our pleasure to spend half day inspecting so much of farms and orchards as could be covered in that time. Among the animals we saw was Histon Wild Geese, champions of the Royal Show, whose average milk yield with her 12 calves was 11,964 lbs. The Histon Dairy Short-horn herd is a genuine dual purpose herd. Many of the cows exceed 10,000 gallons annually. There is also a Lincoln Red shorthorn herd of 150 females. Their Yorkshires and Middle Whites are the most outstanding to be found anywhere and it was an inspiration to see the remarkable size, smoothness and finish of these animals.

But famous as the concern is as a farming organization, it is the combination of farming, manufacturing and marketing which makes this firm unique. From Chivers factory, a whole trainload of goods leaves every day. The factory is the last word in efficiency. The gears in which the fruit is boiled are lined with silver. Jam jars are filled by machines at the rate of 150 to 200 jars per machine per minute. Jam tins carry the products from department to department. Everything is kept clean. Not a mouse is found. Yet there is no hurry, while the workers are evidently content and happy. Thanks to the personal interest that is taken in their welfare and the institution of co-partnership profit sharing. What a contrast from the

OUTSTANDING EMPIRE FIGURES

Outstanding empire figures who have achieved world-wide distinction are included in the list of British Parliamentary Association delegates who will begin a tour across Canada on August 24, from Quebec city. Among the party will be those pictured above: (1) David Kirkwood, Glasgow Socialist, member of the House of Commons, whose fiery remarks once caused his suspension; (2) Sir Patrick McGrath, well-known journalist and president of the legislative council of Newfoundland; (3) Viscount Peel, former secretary of state for India and now commissioner of works, whose duties include supervision of the Tower of London and royal residences; (4) Lord Thomson, ex-secretary of state for air, who believes future travel will be by aeroplanes serving as imperial links; and (5) Thomas Shaw, who started work as a weaver when ten years old and who became minister of Labor in Ramsay MacDonald's cabinet in 1924.

little barn, still standing, in which the first boiling was made. Before leaving we were entertained to tea in the company's dining hall when Mr. J. R. Chivers and Mr. W. B. Chivers told us something of the history of their famous firm and presented every one of us with two tins of jam, exactly like those which were specially made for the Queen's Dolls' House, exhibited at the Wembley Exhibition, in 1924. These tins of jam are the smallest in the world.

No finer lesson in the marketing of farm products, and for that matter in the growing of them, could have been given to a party of farmers than the more pleasure afforded us in the learning of it.

(To Be Continued.)

Raise English Pleasants
Experiment Is Being Made To Introduce Game Bird In Saskatchewan

An attempt is being made in the Alaska and Lovers districts in Saskatchewan, to raise English pheasants of the ring-necked variety. It is not many years since Hungarian partridge was introduced into Western Canada. The experiment will take some years, it is said, and if successful will furnish an added attraction for bird hunters.

Seeking Information
A witness was being examined. "My Lord," he said, "you can believe my statement, for what I have said is absolutely correct. I've been married to truth since my childhood." "Quite possible," replied the Judge, "but what the court wants to know is how long have you been a widow?"

DELEGATES FROM RUMANIA

Judging by the smiles of the two Rumanian delegates to the British World Congress held in Toronto recently, soup tastes the same in both languages. The picture was taken in mid-Atlantic on the Canadian Pacific liner "Montroy" which was chartered by delegates to the Congress from Europe. There were thirty-eight different nationalities in the party.

A Cheerful Personality

People Who Are Pleasant and Sympathetic Have Many Friends

There are smiles and smiles, but the one from the heart is the one which is always remembered. Forced pleasantness is never convincing. The happy faculty of listening gracefully to another's words and never talking of one's own troubles is the thing most difficult to remember and will do more toward lightening life's burdens for the sad one than anything you may do. Everyone in trouble wants to talk of it. No one cares about your own distress. If you can listen gracefully when your own heart is heavy and smile like you mean it, your work for that day is well done.

Cultivate a cheerful personality if you would be popular. No one is a grouch in the party, laugh and the world laughs with you as true to life as of yore, and becoming more and more so as time goes by. Life is so short and there is so much to be lived, that sorrowful persons have no place in the scheme of existence.

Sees Good Market In Canada

Great Britain Waking Up To The Importance Of Canada As A Trade Centre

In the past two years the British manufacturer has been waking up to the importance of Canada as a trade centre, and for this reason, the Overseas Trade Department is reorganizing and improving its system in this country in an effort to bring the necessary facts before the manufacturers of the Old Country," said W. J. Glenn, Inspector General for the organization in question, upon his arrival in Montreal. "We are not here to wave the flag, and ask Canadians to buy British goods merely because they are under the Union Jack, but we want to create an organization here that will enable the manufacturer in England to become acquainted with the problems and requirements of Canadian importers," he stated.

Winnipeg Newspaper Union

Immigration to Canada for June amounted to 20,265, as compared with 18,052 for June a year ago, an increase of 12 per cent, according to a statement made public today by the department of immigration and colonization. For the three months April, May and June, immigration has amounted to 70,927. The previous three months have been British, 23,085, and United States, 9,343.

Wanted the Usual Bones

"MacGregor," said the butcher to the thirty-one who was planning to make an exit from the neighborhood, "I have every reason to believe that you will never pay me the amount due. It would be very foolish of me to see you and you have nothing of value that I care to attach. I'll just give you a receipt and call it paid in full."

"That's awfully nice of you," said Mac.

A few moments later the merchant noticed that Mac was still staring his pedantic extremities in the store. "Was there something you wished to speak to me about?" asked the merchant.

"Well, not exactly. But isn't it customary to give a receipt when his account's been settled?"

SUNDAY SCHOOL LESSON

AUGUST 12

THE COUNSEL AT JERUSALEM

Golden Text:—If therefore the Son shall make you free, ye shall be free indeed.—John 8:36.
Lesson: Acts 13:1-25; Galatians 5:1-15.
Devotional Reading: Psalm 113.

Explanations and Comments

Trouble-Makers From Jerusalem. The Jewish teachers were composed of Jews and proselytes, the latter being Gentiles who had received the Jewish view of circumcision. Other Gentiles who attended the synagogue services were called "free-willers" or "devout," but were not in full fellowship with the rest because they had not been circumcised. We have seen how Paul and Barnabas preached to the Gentiles and founded churches among them at Paphos, Antioch, Lystra, Iconium and Derbe on his first missionary journey, and how he reported to the church at Antioch of Syria, the church which had sent them on their journey that "God had given them of faith unto the Gentiles." The church at Antioch was composed largely of Gentiles, rejoiced over the good news, and did not realize the far-reaching effect of this new departure. When the report reached the church at Jerusalem, the Jews were not so welcome. In fact, it aroused violent opposition. Certain members of that church, who had their own responsibility, went from Jerusalem to Antioch, and said to the Gentiles must first become Jewish proselytes before they could be Christians—must be "circumcised of the custom of Moses" in order to be "saved."

For stand there in much to be said. Since the days of Abraham, and no one denying, had been given to adopt and revitalize the procedure. What had authority to decide it unnecessary? What right had Paul and Barnabas to decide it? Paul had the revelation of a revelation from God, a revelation shown, not by faith, but by the work of the Holy Spirit, which proved God's will by results, which proved God's will by faith. God had shown in His ways with men as well as through His prophets. "The Jews of the first century are the Jews of the present day," said W. J. Glenn, Inspector General for the organization in question, upon his arrival in Montreal. "We are not here to wave the flag, and ask Canadians to buy British goods merely because they are under the Union Jack, but we want to create an organization here that will enable the manufacturer in England to become acquainted with the problems and requirements of Canadian importers," he stated.

Not Confused To Wares

Needless Night Noses Are Public Nuisances In Every Country

The British Medical Association, meeting at Cardiff, Wales, declared war on unnecessary street noises as a menace to the nation's health.

A resolution was adopted urging that the use of night noises be kept to a minimum, and that public nuisances and made punishable. Among them were mentioned the barking of dogs, chatter of milk cans early in the morning, cut-outs of motorcycles and noises of parties going home from dances.

Dr. John Starnes, of Edinburgh, estimated that such noises impaired the working efficiency of the country by \$5,000,000 a year. He explained that they affected the nervous system through the disturbance of sleep, and also caused functional disturbances of the body.

Wanted the Usual Bones

"MacGregor," said the butcher to the thirty-one who was planning to make an exit from the neighborhood, "I have every reason to believe that you will never pay me the amount due. It would be very foolish of me to see you and you have nothing of value that I care to attach. I'll just give you a receipt and call it paid in full."

"That's awfully nice of you," said Mac.

A few moments later the merchant noticed that Mac was still staring his pedantic extremities in the store. "Was there something you wished to speak to me about?" asked the merchant.

Showing Canada her Opportunity in World-Trade

Another Striking Advertisement
by the Trade and Commerce
Department, Ottawa

The various striking advertisements of the Trade and Commerce Department at Ottawa, which have appeared in Canadian newspapers from time to time are calculated to create an "export trade commission" throughout the Dominion.

It was decided last year by the Honorable James Macdonald, Minister of the Department in question, that Canadians should become more intimately acquainted with business opportunities outside their own country. In order to accomplish this, the campaign of publicity was embarked upon.

Canada's external trade has grown in such proportions as probably few Canadians

realize. For instance, in the last fiscal year, ended March 31st, the Dominion's total exports were valued at more than a billion and a quarter dollars, or to be exact \$1,500,450,297. This represents an export trade of more than \$100 for every man, woman and child in Canada. At the beginning of the present century Canada's export trade amounted to less than 200 million dollars.

Another method of gauging Canada's export trade is found in the fact that last year the country's exports of manufactured products alone amounted to about the same as her total production of manufactured products in 1900. In other words, Canada is exporting as much in manufactured articles today as the total output of every factory in the Dominion twenty-eight years ago. These few figures may give readers some comprehension of the immense increase in export business.

Most public men and business men, no matter what their politics may be, agree that export trade is possibly the most valuable asset the Dominion can have. Canada's natural resources are so varied and so rich that it would be impossible for Canadians to consume them. Take wheat for example: It is manifestly impossible for 9,000,000 people to consume 400,000,000 bushels of wheat annually. Canada's future prosperity therefore is bound up in selling surplus abroad for her surplus production.

When Canadian business men seek to sell their products in other lands, they cannot help to realize this. They have to meet competition from thousands of other business men and producers living in other countries. They are faced with fierce world competition in maintaining their hold on export business. To maintain this trade of a billion and a quarter dollars a year and to increase it, Canadians must become acquainted with every legitimate method known to business. They must learn how to pack their goods, the manner desired by the foreign buyer, they must learn how to keep their goods low to ship these goods by the most economical and direct method. And perhaps most important of all Canadian goods must always be kept up to the standard of the market demanded.

The Department of Trade and Commerce, at Ottawa, is doing everything in its power to further this export trade. Years ago a Commercial Intelligence Service was established, and trained trade commissioners sent to the world's trade centres. In fact, Canada had the first trade commissioners abroad, thus inaugurating a system which has been widely copied. Today this country has 24 trained trade commissioners in strategic business centres. More men are now in training to go to other places. The government has by subsidy, and other means, obtained first-class shipping facilities to these business centres. The trade commissioners are constantly on the alert, seeking out opportunities for the selling of Canadian products. Whenever they learn being placed, they immediately communicate with the Commercial Intelligence Service at Ottawa, giving all information they possibly can. This information in the possession of the service at Ottawa is at the disposal of any Canadian producer or manufacturer. This system, the result of some years' experience, is thoroughly organized and working smoothly. To-day the Canadian manufacturer or producer can find out with little trouble, and at no expense, if his products can be profitably marketed in almost any part of the world. So encouraging have results been from the export system adopted by Canada, and so well have Canadian goods been received abroad, that it is fairly proclaimed that within a decade Canada's exports will amount to double the present figure. Hon. Mr. Macdonald as the responsible head of the department believes in having Canadians fully informed as to opportunities abroad. To do this he is reaching the people through newspapers, magazines and trade journals.

Easy To Handle...

Owners are emphasizing how easily Graham-Paige motor cars handle in traffic—and the relaxation they enjoy in driving the open road. A car is at your disposal.

Joseph B. Graham
Robert C. Graham
Ray A. Graham

Five chassis—size and eight—price ranging from \$145 to \$350. Car illustrated is Model 640, five-passenger Sedan, \$195. All prices F. O. B. Windsor, taxes paid.
